

Timeplan demonstrate continued product innovation at the 2011 CV Show

April 2011 - Timeplan are pleased to announce their attendance at this years' CV Show where they will demonstrate to the industry that the Timeplan name is the one to trust when selecting fuel management solutions. Timeplan have new, state of the art products to offer commercial vehicle operators and will be present at the show to provide expert advice on the latest fuel storage, dispensing and control solutions.

Timeplan have long been recognised for industry leading innovation in Fuel Management products. At the CV show they will demonstrate the latest additions to their range including their "fool-proof" Automatic Vehicle Identification and odometer collection technologies, as well as their web based fuel management solution, complete with hosted data services.

Following the recent inclusion of Timeplan within The Premier Group of Companies, Timeplan are now also able to offer an even more comprehensive and responsive service capability. Investment in both the maintenance network and spares availability will allow customers greater peace of mind from more effective service delivery with minimal lead times.

With thousands of installations nationwide - and now in Europe & the Middle East, Timeplan are responsible for some of the field's most significant advances.

Timeplan are dedicated to the continual development of both their products and services in line with customers' requirements and expectations.

Offering the option of a complete fuel storage solution of tanks, pumps and pipework installations, existing and new customers can be assured that Timeplan are still the only logical choice for Fuel Management solutions.

Industry "insiders" might say that the Hedgehog has awoken from its hibernation. Come and see Timeplan on Stand 4G 112 at the 2011 CV Show and discuss the latest advances.

About Timeplan:

Timeplan, part of the Premier Group of Companies, has a long history in fuel management systems. Recognised for quality and innovation, Timeplan provide commercial vehicle operators with flexible solutions to accurately monitor fuel usage and to maximise efficiency.
